WORK NOTICE

REMOVAL ACTION WORKPLAN FIELD ACTIVITIES

**Inglewood Unified School District (IUSD)
Future Site of the La Tijera Elementary School K-8
1415 South La Tijera Boulevard, Inglewood, California**

The Department of Toxic Substances Control (DTSC) will oversee the removal of approximately 4,900 cubic yards of contaminated soil at the site. Approximately 320 truckloads will be used to transport the soil. This work is part of the Removal Action Workplan (RAW) that was approved with public comment by DTSC.

To ensure public safety and minimize dust, the following actions will be taken during this process:

- Fencing with windscreens will be installed for security
- All vehicles will maintain slow speeds while on the property
- Work areas will be sprayed with clean water to control dust
- Trucks will be secured with covers as they leave the site
- Truck tires will be brushed to remove soil and debris when entering and exiting the site
- Air will be monitored at the site to ensure the amount of dust stays at safe levels

Clean-up activities are scheduled to begin in **early-to-mid December 2009** and are expected to continue through **early January 2010**. Work will occur between the hours of 7 a.m. and 5 p.m.

Efforts will be taken to minimize noise and disruptions to traffic. No street closures are planned. DTSC will continue to oversee the work being conducted by IUSD and will continue to update the local community.

Additional information on the school's environmental investigations is available at the following locations:
